

MISSION

Develop and deploy a missile defense system; manned by ARNG Soldiers, capable of protecting not only the United States but our friends and allies beginning in October 2004.

BACKGROUND INFORMATION

- * Defense of the nation's homeland has long been a traditional role for the National Guard Bureau.
- * Homeland Security is currently a National Guard Mission.
- * Our objective demands year-round recruiting efforts from all US armed services
- * Expansion of GMD role includes professional development, life cycle management

DEFINITION OF MISSILE DEFENSE (MD)

- MD is a system of systems designed to provide limited ballistic missile defense of the 50 United States.
- Ground-Based Midcourse Missile Defense (GMD) System Architecture will include the following:
 - ✓ A Ground-Based Interceptor Subsystem (GBI)
 - ✓ Forward X-Band Radar Sites (XBR)
 - ✓ A Battle Management, Command, Control, and Communications Center (BMC³)

GMD ENGAGEMENT SCENARIO

Based on a cue from the BMC3, the XBR acquires and tracks the target complex then discriminates the warhead from the decoys.

4

Once separated from the booster, the kill vehicle acquires the target complex, discriminates the warhead, and guides itself toward intercept.

6

Finally, the X-band radar and SBIRS perform kill assessment

7

Based on track information from the UEWR and XBR, the BMC3 directs the Interceptor to be launched into an area where it can detect the target.

5

The Upgraded Early Warning Radar confirms the launch and narrows the possible location of the incoming warhead.

3

The space sensor (DSP or SBIRS) detects the launch and alerts the Command Center; launch and impact points are determined.

2

The threat launches a missile toward the US.

KEY

- Early Warning Radar
- Radar
- Interceptor Site
- Space Sensors

CURRENT OPPORTUNITIES

- 14A Air Defense Officer
- 14J10-30 Engagement Control Shift Leaders
- 31A ★ Military Police (Officer)
- 31B10-30 ★ Military Police (Enlisted)
- 140A ★ C2 Systems Integrator
- 915A7 ★ Unit Maintenance Officer

SUSTAINING OPERATIONS

- Although immediate openings are available, soldiers are placed on an order of merit list (OML) to ensure coordinated PCS, training, and assignment consideration depending upon the need of the GMD system for which applying.
- PCS/Training orders follow about 90 days after selection.
- Reclassification of soldiers is permitted on a case-by-case basis depending upon the need of the GMD system for which applying.

THE APPLICATION PROCESS

To be considered for a GMD Title 32 Tour, your application must be processed through the NGB-Missile Defense Recruiting and Retention Team. Our team will:

- ✓ Solicit and screen applications from all services.
- ✓ Request clarification, further documentation when needed.
- ✓ Forward your application to the Eligibility Review Panel (ERP).
- ✓ Forward your application to the Suitability Review Panel (SRP).
- ✓ Forward your application to the Duty Assignment Selection Panel (DASP).
- ✓ Assist Alaska & Colorado with the Interstate Transfer Process (IST) to get you and your family to your new assignment quickly.

THE APPLICATION PROCESS

- If a member of the Air Force, Navy Marines, must be discharged from the branch with concurrent appointment or enlistment in the ARNG, this action must be completed prior to reporting to an initial AGR entry point.
- You must meet the medical fitness standards of AR 40-501, Chapter 3.
- If you are an officer in the grade of lieutenant or captain with ≤ 5 years time in grade, you must have completed the officer basic course.
- A captain with at least 5 years time in grade must have the officer advance course.

THE APPLICATION PROCESS

- W01/CW2 must have completed a warrant officer basic course or received MOS proponent equivalent.
- Must be able to complete a 3 year initial tour of active duty prior to completing 18 years of active service.
- Must possess a valid security clearance required for the grade MOS/AOC and AGR duty position
